This conference is concerned with Building Education and Research. It will be a landmark gathering of more than 200 international academics, industrialists, professionals and policy makers concerned with advances in construction and property education. It will include examples of leading edge collaboration between academe and partners from industry, the professions and government.

The hosts for the conference are the 5* rated, world-leading School of Construction and Property Management at the University of Salford. Salford has a pre-eminent reputation for its academic leadership in the discipline, its collaboration with industry, its exploitation of modern techniques of e-learning and innovative approaches and excellence in construction education. The School has recently received the Queen's Anniversary Prize for Further and Higher Education in the UK as a result of the excellence of its work in teaching and research in collaboration with industry. It is the only University activity in construction and property to have been included in this aspect of the UK national honours system.

2000

Invitation to a Debate

Motion: Inclusivity in Professional Accreditation leads to better results for:

- Business
- Professional Institutions
- Universities

9th April 2003
5:30 - 7.00pm
The Lowry, Salford Quays
FREE OF CHARGE

Professor Dennis Lenard

As part of the BEAR 2003 conference a major debate will take place on future developments in international professional accreditation, chaired by Professor Dennis Lenard of University of Technology, Sydney. Dennis is the immediate past Chairman of the International Cost Engineering Council. He is past national president of the Australian Institute of Quantity Surveyors and the inaugural chairman of the Pacific Association of Quantity Surveyors.

Professor Trevor Mole

The debate will feature a contrasting set of views on the future of professional accreditation globally. Two paradigms are emerging. One identified as "exclusive", input oriented, aimed at high flyers, and based on performance measures of collaborating partners. The second seen as "inclusive", output oriented, aimed at all with ambition, and based on what is offered and the value it adds rather than who is offering it.

Professor Peter Brandon

Advocates for the EXCLUSIVE approach delivering best results will include:
Professor Trevor Mole, Past President, BS Division, RICS
Professor Tony Walker, Emeritus Professor, Hong Kong University
Professor Peter Brandon, Formerly PVC Research, University of Salford

Professor John Bale

Advocates for the INCLUSIVE approach delivering best results for:
Professor John Bale, Past President, CIOB
Dr Andrew Platten, Chair, Recognition of Awards Division, CIOB
Alan Crane, Chairman, Re-thinking Construction

Please join us and participate in this lively debate.
