

ROYAL GEOGRAPHICAL SOCIETY
(WITH THE INSTITUTE OF BRITISH GEOGRAPHERS)

Annual Conference Session, 3-6th September 2003
London

CALL FOR PAPERS

The newly created **Geographical Information Science Research Group** and the **Postgraduate Forum** are jointly organising a 1 day session at the annual RGS-IBG conference at the Royal Geographical Society, London, 3-6th September 2003.

Papers are encouraged by all postgraduate students on the general topic of GIS and GIScience, at all stages of research, be it doctoral research or Master's research. The session intends to cover as wide a range of topics as possible, to explore the depth of work taking place by today's postgraduate students. Contributions are encouraged from both physical and social science. Similar to other PGF sessions, this is intended to be welcoming and relaxed, and is ideal for first time presenters.

Abstracts of up to 200 words should be submitted to the organisers by Friday the 7th March, 2003. There is a form available for this at <http://www.casa.ucl.ac.uk/conference>. Please email this to conference@casa.ucl.ac.uk.

Further details of the conference can be found on the RGS-IBG website:
